Introducing The New X-3000 Currency Sorter with Fitness Detection, Denomination Sorting and processing of Casino Barcoded Tickets

X-3000, a multi-functional Currency Sorter, provides high-performance and heavy-duty operation in a convenient desktop foot-print. With two full-stackers and a separate reject pocket, X-3000 is equipped with most comprehensive user-interface & functions for high-volume cash processing at bank tellers, cashiers at large retails and CITs; further, best suitable for casino operators to process cash and casino tickets with barcoded feature. With an ergonomic design and TFT color external control unit, X-3000 provides users with clear visual of counting results of denomination sorting or fitness separation while allows uninterrupted operation. In addition to its highest efficiency, X-3000 provides advanced and multi-level counterfeit detection protection against sophisticated counterfeit attempts.

4.3" External or attachable TFT color control panel unit with graphic User interface. Easy to view and browse.

Three-Stackers design with Dual Stackers for accepted banknotes and a Reject stacker for all rejected and suspect bills

Easy access to all bills paths from front access. Easy jammed bill removal and routine maintenance

Various I/O ports for easy software upgrade, PC software connectivity, external printer and remote display

Features

- Processing of up to 10 currencies in one single machine (USD currency as standard)
- Counting Mode includes Mix, Sort, Face, Orient, Fitness, Barcode (Tickets), SN (option)
- Full fitness sorting capability with tape & three levels of detection (ATM, FED FIT, UNFIT)
- Two denomination sorting into two separate stackers or use second as an overflow pocket
- Separates Currency & Casino Tickets into two stackers; sends Ticket decoding info to PC
- Dual-User design allows two tellers to share one machine with individual setting preferences
- Simple Maintenance; Easy access to all bill paths from front access (cabinet design) facilitates jam bill removal and routing maintenance work
- Equipped with advanced sensors including Image, MR, MG & UV to detect counterfeit bills
- Full range of I/O Port includes dual COM ports, USB, & LAN
- Easy system and software upgrade via USB PC connectivity or SD Card

Specifications

- Feed System: Roller friction system
- Counterfeit Detection: Dual CIS, Magneto-resistive, Multi-channel of 2*MG and UV sensors
- Counting: 600 / 900 / 1200 NPM (< 800nmp in denominating, Sorting, Fitness, decoding)
- Available Currencies: USD (standard), EUR, GBP, CAD and many other countries
- Hopper Capacity: Max. 500 notes (new)
- Stacker Capacity: Max. 200 notes (circulated) to each stackers
- Reject Capacity: Max. 200 notes (circulated) to reject stacker
- Countable Note Size: 60 x 85 x 0.08 mm -100 x 190 x 0.12 mm
- Display: Count display for each pockets and 4.3" External TFT color control panel
- Power Supply: 100 - 240 V, 50/60Hz
- Power Consumption: Max. 100 W
- Dimensions: 14.2" (W) x 17.3" (D) x 17.3" (H)
- Weight : 66 lbs / 30 kgs
- Interface: RS -232 x 2
USB x 1, SD card, LAN

- Options: Remote Display
Thermal Printer
Dot-Matrix Printer
