Model 776-E

Embossed-Dated-Signed

Certification in less than one second - all in one motion!

Widmer 776-E

The Widmer 776-E embosses a raised seal into a document while at the same time prints a combination of signature, title, date and additional text—all in one easy step!

Signature and text may be printed in single or tri-colored ink.

The print/emboss trigger is paper activated—no buttons to push or levers to pull.

Also available with a printed indelible ink seal on the model TV776. The TV776 was introduced in 1976 and the 776-E uses the same rugged components.

Iron cast upper and lower casing insures stability and long life.

Options include :

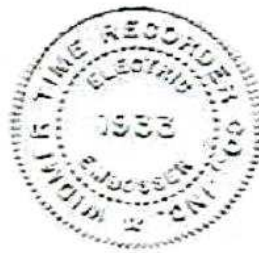

- Electric security lock
- Fixed or adjustable guide plate
- Military or conventional date and time

The Widmer 776-E satisfies a broad range of applications. It can sign, validate, certify and date university and college transcripts, birth & marriage certificates, and offer the one-step solution to many municipal, county, state and national government agency applications.
