

# X/Series/1

## Currency Counter/Discriminator with CF Detection

The X/Series/1 is the world's most compact currency discriminator with a dedicated reject pocket. It is equipped with the most comprehensive, user-friendly functions necessary for tellers and cashiers in any cash handling environment. With an ergonomic design, color LCD, and intuitive interface, the X/Series/1 not only provides tellers trouble-free operation and an efficient working environment, but also allows uninterrupted counting with the dedicated reject pocket. In addition to its high efficiency rating and superior user experience, the X/Series/1 provides exacting security standards against the latest counterfeiting attempts through multi-detection technology, while still maintaining a low false alarm level and an excellent acceptance rate.

### FEATURES

- Multi-Currency Detection: Up to 5 currencies (USD Standard)
- User-Selectable Count/Read Options
- LCD Display: Color TFT LCD and full graphic UI notification
- Dual User Design: Two tellers share one machine with individual setting preferences
- Simple Maintenance: Easy access from top and rear bill path facilitates routine maintenance work
- Compact Design: Small footprint and modern appearance
- PC Upgrade: Easy connectivity for system and software upgrade
